FLEXPIPE PULSE

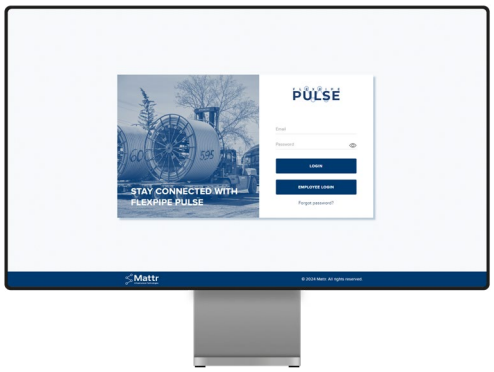
Real-Time Pipeline Insights, Anywhere, Anytime

Cloud-Based Control for Every Installation

Flexpipe Pulse is a cloud-based mobile digital toolset designed to enhance pipeline installation quality, traceability, and efficiency. With real-time reporting, GPS-enabled tracking, and a comprehensive resource library, Flexpipe Pulse provides full visibility of installation activity while reducing project execution risks.

Features include instant access to critical project data, contractor assessments, and historical records through the *Flexpipe Pulse Portal*, improved traceability and accountability with the *Mobile Integrity App*, and streamlined field inventory management with the *Reel Tracker*.

Flexpipe Pulse offers seamless project monitoring, reduced costs, and increased compliance — all in one secure, easy-to-use platform.



FLEXPIPE PULSE PORTAL

An online interface which provides instant access to essential information.

- Reduce emails and phone calls
- Track project costs
- Increase installation quality
- Promote contractor compliance
- Monitor project status
- Access project data

MOBILE INTEGRITY APP

Improving installation quality through increased traceability and accountability.

- Traceable, verifiable and complete digital quality records
- GPS locations for installed fittings
- Cloud-based software to ensure longevity and security of stored data
